

Comparison of state and county reports of registered voters for May 2024

In most cases, the Primary Recap provided by a county does not report the number of registered voters.

The state of Kentucky does provide a report (voterstatsprecinct-May 2024.pdf) that includes precinct-level statistics on registered voters for May 2024. This report is included in the source folder and a csv data file (ky_registered_voters_precinct_may_2024.csv) derived from the pdf source is included in the data folder.

The tabulation below compares county and state reports of registered voter counts for a few semi-randomly selected precincts that did include registered voter statistics in the Recap report.
